

VRV LIFE™ RESIDENTIAL APPLICATION

FOUNDATION LEVEL DESIGN WORKSHOP
(Length: 1 Day)

WHAT

A full day course providing hands on design and application training for residential VRV LIFE systems

- » Overview of variable refrigerant volumes system's components and operation
- » Application of Daikin VRV LIFE systems, features, and control capabilities
- » Selection and optimization of key system components including indoor units, outdoor units, gas furnaces, zoning kits, and refrigerant piping
- » Utilization of Daikin's Residential VRV Selection Software (WEBXpress)

HOW

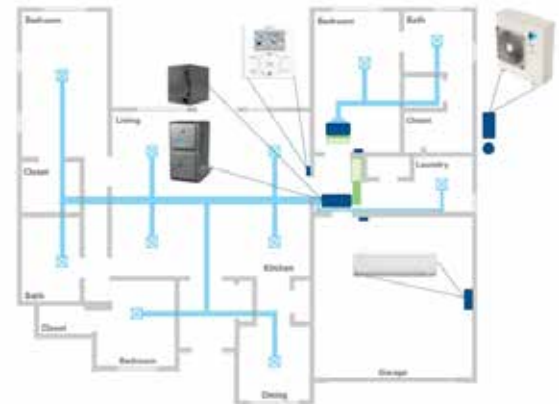

The course is structured into four main parts:

- » **Training:** Presentations covering all aspects of the VRV LIFE product, it's application and the use of the WEBXpress selection tool
- » **Design:** Participants design a project based on a given scenario
- » **Presentation:** Participants demonstrate their project design
- » **Solution and Summary:** Trainer provides optimized solution(s) and summarizes learning

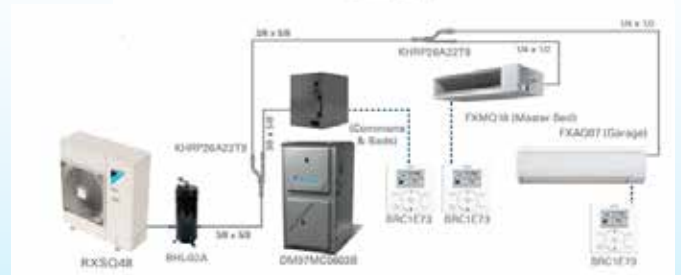

WHO

The target audience includes Daikin **distributors and dealers**, their associated **contractors** and those **involved in the project design process**

WHEN AND WHERE

The course is provided locally by Daikin Application Engineers upon request. Consult your Daikin representative for availability or contact our team direct at: applications.engineering@daikincomfort.com
